● ABOUT ME

Senior Software Engineer with 6 years building and maintaining production systems in .NET, React and Azure, most recently at WTW, working daily with U.S. teams in English.

Now based in Milan, starting a two-year MSc in High Performance Computing Engineering at Politecnico di Milano (Sep 2026). I'm looking to move from web/enterprise engineering toward parallel computing, performance optimisation and scientific computing infrastructure.

● WORK EXPERIENCE

29/02/2024 - 21/08/2026 - LIMA, PERU

SENIOR SOFTWARE ENGINEER WTW

- Full-stack development and maintenance.
- Principal maintainer of the shopping motor (plan showcase, plan compare, quoting) used by 1000+ users daily.
- Principal maintainer of rule-based solution for plan filtering in a 200+ plans marketplace.
- Frequently used Azure resources via web management and through Terraform.
- Regular collaboration with U.S. teams in English.
- Advocate for comprehensive documentation in all repositories.

Business or sector Financial and insurance activities | **Department:** Individual Marketplace | **Website:**

<https://www.wtwco.com/>

01/07/2020 - 01/03/2024 - LIMA, PERU

SENIOR CONSULTANTE Y

- Design and development of web-based solutions for international clients using React, Angular, .NET, and Azure DevOps.
- Tech-lead for development teams of 5+ developers and QA testers.
- Constant communication with international teams and clients in English.
- Oversaw information security for multiple deployed solutions.
- Managed projects using the SCRUM framework, ensuring timely delivery.
- Developed dashboards and performed data analytics for business insights.
- Conducted budget planning for new software solutions.

Business or sector Financial and insurance activities | **Department:** Integrity Risk Services - Assurance | **Website:**

https://www.ey.com/es_pe

01/07/2018 - 01/07/2019 - LIMA, PERU

TRAINEE GROUP M LATAM

- Built and managed dashboards (Tableau, Datorama) for a range of brands.
- Produced reports from digital data and handled website tagging.
- Data analysis, classification and prediction using R and Python.

- Econometric modelling (Marketing Mix Modeling).
- Managed advertising platforms: Google Analytics, Facebook Ads, Google Ads.
- Website audits and SEO.

● EDUCATION & TRAINING

01/04/2015 - 01/07/2020 - LIMA, PERU

BACHELOR IN SYSTEMS ENGINEERING- UNIVERSIDAD DE LIMA

Field(s) of study: Systems Engineering | **Final grade:** 1st Place of 2020 Class | **Number of credits:** 200 | **Thesis:**

Comparison of convolutional neural network-based architectures for group emotion recognition using facial expressions |

Website: <https://www.ulima.edu.pe/>

14/09/2026 - 31/07/2028 - MILAN, ITALY

MSC IN HIGH PERFORMANCE COMPUTING ENGINEERING (IN PROGRESS)- POLITECNICO DI MILANO

Parallel and distributed computing; advanced computer architectures for supercomputing; numerical linear algebra and numerical methods for PDEs; scientific computing; software engineering and performance optimisation for HPC; computing infrastructures and data centres; applied statistics; deep learning and large-scale data systems; quantum computing.

Level in EQF: 7

● LANGUAGE SKILLS

Mother tongue(s): **SPANISH**

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH	C1	C1	C1	C1	C1
ITALIAN	A1	A1	A1	A1	A1

● SKILLS

JavaScript Framework | JavaScript | C# | Web Designing & Web Development | Python (computer programming) | machine learning | Artificial Intelligence | SQL Server | Git/Github, Docker, Gitlab | TypeScript | React Redux | Pascal (computer programming) | software design methodologies | artificial neural networks | Deep Learning, Reinforcement Learning, Regression, SVM, RF, Naive Bayes, Clustering, LASSO | Sentiment analysis

● HONOURS AND AWARDS

28/11/2023 Contraloria General de la Republica del Peru

1st Place CAII 2023 Hackathon: Revolucionando el futuro del control First-place winner at the first hackathon organized by the Office of the Comptroller General of the Republic of Peru as part of the International Annual Integrity Conference (CAII) 2023.

Developed the winning solution for the "Juku Challenge" (detecting corruption and contributing to the Comptroller's Corruption and Functional Misconduct Index): a web platform that provided users with visualization tools for each available corruption indicator, generated new indicators using collected data and machine learning models, performed sentiment analysis of social media and news, and delivered a corruption score for each government entity.

The project was developed over two weeks and presented at the conclusion of the event.
